Work Experience

Full Stack Engineer - Upgrade Services Buffalo, NY
Odoo: Open Source ERP and CRM *since October 2025*

- Develop and maintain upgrade scripts to automate data migrations and enable seamless version-to-version transitions while preserving data integrity
- Engineer solutions and implement client-specific functionality during version migrations
- Refactor and optimize modules to eliminate redundancy and improve maintainability
- Collaborate with internal teams to plan and execute system upgrades with minimal disruption

Full Stack Engineer Buffalo, NY
Odoo: Open Source ERP and CRM *Feb 2024 – Oct 2024*

- Expert in inventory and manufacturing modules, specializing in stock-related workflows
- Resolved roughly 35–40% of US stock-related tickets, leading the department in this area
- Ranked 6th out of 29 North American engineers in overall ticket contributions
- Served as the internal point of contact for stock-related inquiries within the department

Full Stack Engineer Intern Buffalo, NY
Odoo: Open Source ERP and CRM *June 2023 – Sept 2023*

- Created a sales commission module bridging Sales and Accounting to automate commission plans for salespeople

Education

SUNY Brockport Brockport, NY
Bachelor of Science in Computer Science *Aug. 2021 – Dec. 2023*

Suffolk County Community College Suffolk, NY
Associate's in Liberal Arts *June 2020*

Projects

Sales Commission module in Odoo 16

- Developed a custom sales commission module for Odoo, enabling efficient commission tracking and management
- Implemented in Python, leveraging Odoo's framework for seamless integration with the existing system
- Designed intuitive user interfaces and data structures for commission modules

SUNY Brockport mHealth iOS App

- Translated high-fidelity wire-frames into a functional iOS prototype for the Hazen Health Center with SwiftUI
- Recognized for contribution at NCUR 2023; awarded undergraduate research accolade from SUNY Brockport

Technical Skills

Languages: Python — the one that pays my bills
JavaScript, HTML/CSS — flexbox survivor
C, C++, Swift — relics of my past, please don't quiz me on this
Frameworks/Libraries: Django, React — haven't held hands recently
Databases: SQL, PostgreSQL
Version Control: Git/GitHub
